

Vlayx Due Diligence Report

Prepared from recursive review of target folder tree and ZIP contents

Scope item	Result
Target	/DD/Vlayx inputs - for testing
Tree files inventoried	582 files
ZIP-expanded files reviewed	135 files
Extractor errors after remediation	0
Report date	1 Jun 2026

Every file in the tree was inventoried; ZIPs were expanded into the work area for content extraction.

File type	Count
PDF	496
XLSX	80
XLS	62
Tally .1800	29
Tally .TSF	13
Images	15
PPTX	6
TXT/CSV/DOCX/ZIP/metadata	16

Substantive text extracted from PDFs, Excel workbooks, PowerPoint decks, DOCX, CSV/TXT, Tally text-like files, and ZIP inventories. [S0]

Image files were inventoried and visually reviewed into image_review.csv; ZIP duplicates were tracked in the manifest. [S0/S24]

Full audit trail: manifest.csv, coverage.csv, image_review.csv, extracted_text/*, and zip_expanded/* in DD/Vlayx_DD_work. [S0]

Company is incorporated as Valyx Wealthtech Private Limited, CIN U62099KA2023PTC175741, and self-certified as an IT Services/Product Development startup valid to 7 Jul 2033 if eligibility remains met. [S1/S20]

FY25 statutory financials show INR 0.897m revenue from operations, INR 3.155m other income, INR 15.272m expenses, and INR 9.656m loss after deferred-tax credit. [S1]

FY26 YTD accounts are not diligence-ready: books extract shows INR 9.673m operating income while provisional FR shows INR 6.777m total income for the same 28 Feb 2026 cut-off. [S2/S4]

Commercial proof is real but early: current customer ACV list totals INR 8.95m, with pilots/prospects adding INR 11.5m expected first-year ACV, but executed contracts are limited in the corpus. [S10/S14/S16]

Highest immediate control issue: tax/GST/TRACES credentials are stored in plaintext in a document. [S22]

Valyx was incorporated on 8 Jul 2023, with registered office in Bengaluru and business described as information technology software-as-a-service. [S1/S20]

Directors/signatories listed in financials are Avishek Ray (DIN 09146884) and Anirudh Bhargava (DIN 10231484). [S1/S2]

Cap table sheet lists holdings: Avishek 57.56%, Anirudh 19.19%, Waveform 11.65%, Huddle 8.44%, Propel 1.86%, Bharat Founders Fund 1.11%, Sahil Kini 0.18%. [S10]

SSHA dated 28 Aug 2023 states the company business as software platform plus financial services including treasury management and financing discovery. [S19]

Founder employment agreements appoint Avishek as Founder & CEO and Anirudh as Founder & CTO, effective 15 Aug 2023. [S18]

Mooving order form describes Valyx as a cloud-based billing, revenue management, reconciliation platform automating billing, invoicing, collections, and receivables reconciliation. [S14]

Mooving service term is 1 Apr 2026 to 31 Mar 2027 with capacity for 50,000 invoices and 50,000 payments per month. [S14]

AGI/Hindware scope frames the product as automating payment follow-up, customer on-account suggestions, payment advice reading, invoice knock-off, ledger communication, and TDS follow-up. [S16]

Pricing proposal includes INR 465k one-time setup/configuration fees plus usage fees such as INR 30 per POD, INR 50 per payment advice, and INR 16 per ageing report. [S12]

Operational dependency: org chart places CEO over sales/procurement and CTO/CISO/DevOps over engineering, with design, HR, customer success, and founder's office as functions. [S17]

Commercial Traction

Current ACV, pilots, and pipeline.

Bucket	Documented items	Value
Current customers	Fynd, LetsTransport, Bhawar, ClickPost, Cygnet, Zippee, Amaze, QED, Vinculum	INR 8.95m annual revenue list
Piloting/strong prospects	Hindware, AGI, Setu, Synokem, PSB Alliance, Freighttiger, Jeena	INR 11.5m expected first-year ACV
Named pipeline	HCCB, Movin, Unicommerce, Delhivery, CP Plus, Arvind Fashions, Phicommence, Grant Thornton	Stage-level only
Outbound engine	876 enrolled, 90 replies, 40 meetings booked/done in tracker	No closed-deal count shown

Upsell notes are qualitative for ClickPost and Cygnet; value is not quantified in the customer sheet.
[S10]

Pipeline needs conversion proof: the tracker has meetings and replies, but total deals created is blank in the summary area. [S13]

Reported statutory/provisional financials.

INR m	FY25 actuals	YTD Feb-26 provisional
Revenue from operations	0.897	5.663
Other income	3.155	1.114
Total income	4.052	6.777
Total expenses	15.272	18.206
Profit before tax	(11.220)	(11.429)
PAT / current year earnings	(9.656)	(11.429)

Expense base is primarily people: FY26 YTD employee benefits expense is INR 15.788m, 86.7% of total expenses. [S2]

FY25 loss is reduced by INR 1.563m deferred tax credit; no current tax is shown in FY25 or FY26 YTD. [S1/S2]

The audited/provisional workbooks include formulas and #REF references in cash flow areas, so the financial model needs reconstruction before reliance. [S1/S2]

Material inconsistency at the FY26 YTD cut-off.

Metric	Books extract YTD Feb-26	Provisional FR YTD Feb-26	Issue
Sales / revenue from operations	INR 5.663m	INR 5.663m	Agrees
Interest/other income	INR 4.010m interest + INR 0.021m refund	INR 1.114m other income	INR ~2.9m unexplained difference
Total income	INR 9.673m	INR 6.777m	Does not reconcile
Cash/bank/FD presentation	Bank INR 14.752m plus FD INR 20.000m	Cash and bank balances INR 42.995m	Classification/reconciliation gap

This is a diligence blocker for valuation: management accounts, GL, bank statements, FD schedules, and financial statements must be tied out to one cut-off package. [S2/S4/S6]

Unique invoice support reviewed: 48 unique customer invoice PDFs in the FDD invoice folder, totaling INR 9.471m gross invoice value. [S9]

The invoice support is concentrated: Shopsense/Fynd invoices total INR 8.022m, about 84.7% of the unique invoice sample. [S9]

DIPTAB invoices total INR 1.449m in the same unique invoice sample. [S9]

AR aging separately includes SMS Supply Port, Collegedunia, QED, Bhawar, ZFW, Amaze, and DIPTAB, showing the invoice sample is not a complete revenue population. [S8/S9]

Required follow-up: complete customer-wise revenue bridge from GL to invoices to bank receipts and deferred/unbilled revenue schedules. [S4/S8/S9]

AR, AP, and cash/FD position.

Area	Finding	Risk
AR	INR 1.102m total receivables at 28 Feb 2026; INR 0.439m aged 6-12 months and INR 0.151m aged 1-2 years	Collection/provision risk
Specific overdue AR	Collegedunia and SMS Supply Port include invoices 392-545 days old	Quality of revenue risk
AP	Trade payable schedule shows INR 22,356 MSME payable at 28 Feb 2026	Low quantum; verify MSME compliance
FDs	Two INR 10.0m fixed deposits started 28 Nov 2025 at 6.60%, maturity 28 May 2027, no lien marked	Cash support, but confirm unrestricted use

Bank confirmation image is dated 21 May 2026 and confirms the FD balances as of 28 Feb 2026. [S24]

GSTIN 29AAJCV5054D1Z6 appears across invoices, GST workbooks, and statutory documents. [S1/S9]

GST/TDS folders include challans, GSTR-2B/GST registers, and TDS payable workbooks through FY26, indicating records exist for statutory verification. [S0]

YTD Feb-26 balance sheet records output IGST INR 10,121, output CGST INR 29,070, output SGST INR 29,070, TDS payable INR 12,302, and TDS on salaries INR 89,627. [S6]

Plaintext credentials are present for Professional Tax, GST, Income Tax, and TRACES; this is a live security/compliance control failure. [S22]

Immediate remediation: rotate all exposed credentials, document MFA/vault controls, and confirm no unauthorized portal activity. [S22]

Mooving agreement is digitally signed by Avishek Ray and Pooja Agarwal on 20 Feb 2026; service period is 1 Apr 2026 to 31 Mar 2027. [S14]

Awfis agreement provides 8 seats from 18 Nov 2024 to 15 Dec 2025 with 2-month notice period and signed execution metadata. [S15]

SSHA dated 28 Aug 2023 documents pre-seed CCPS investment terms and investor rights. [S19]

Founder employment agreements exist for both founders; each includes full-time duty language and IP/confidentiality provisions. [S18]

Data gap: several current/pipeline customers in KPI materials do not have corresponding executed contracts in the reviewed contract folders. [S10/S14/S16]

Org chart shows two-founder leadership: Anirudh over CTO/CISO/DevOps and engineering; Avishek over CEO, sales, and procurement. [S17]

The same org chart lists engineering, design, HR, customer success, and founder's office as functions, but does not show headcount by person or reporting line depth. [S17]

Leadership open roles slide identifies six critical hires: backend billing lead engineer, backend receivable lead engineer, UX design lead, sales lead, marketing lead, customer support lead. [S17]

Payroll books show employee benefits as the largest expense line; FY26 YTD employee benefits were INR 15.788m. [S2]

Request full employee roster, ESOP/equity grants, offer letters, payroll statutory filings, attrition, and founder vesting status. [S2/S17/S18/S19]

Mobile device policy is based on ISO/IEC 27001:2022, document no. Valyx/II/ISM/POL-12, version 1.0, effective 30 Jun 2025. [S21]

The same policy lists CISO as approver and classifies the document as internal. [S21]

Security posture is inconsistent with policy maturity because tax/GST/TRACES credentials are exposed in plaintext in the diligence corpus. [S22]

Mooving SaaS terms hold customer responsible for account/password security and equipment; Valyx should show equivalent internal access controls for its own systems. [S14/S22]

Data gap: no SOC2/ISO certificate, pen test, cloud architecture, access logs, SDLC evidence, incident register, or DPA/security addendum was found in the reviewed corpus. [S0/S21/S22]

Projection assumptions need validation.

Projection workbook assumes FY26-FY31 annual revenue grows from USD 0.4m to USD 37.864m, translating to INR 3.36cr to INR 318.06cr. [S10]

Projection model assumes FY26 10 users growing to 400 by FY31 and software ACV rising from USD 40k to USD 80.454k. [S10]

Model lists TAM assumption of 45,000 companies in INR 30-500cr turnover range and notes external TAM counts, but no independently sourced market study is tied to the model. [S10]

Comparable deals tab cites 20x-50x revenue-to-valuation multiples for billing/AR/procurement automation companies. [S10]

Risk: plan depends on conversion of current pipeline and high ACVs while FY26 YTD revenue from operations is INR 5.663m. [S2/S10]

FY26 income mismatch: books extract reports INR 5.663m sales plus INR 4.010m interest income, while provisional FR reports INR 5.663m revenue and INR 1.114m other income. [S2/S4]

FY26 cash/FD mismatch: books balance sheet presents bank balances plus two INR 10m FDs separately, while provisional FR presents INR 42.995m cash and bank balances. [S2/S6]

Financial workbook integrity issue: cash flow worksheets include #REF references, including operating cash flow lines. [S1/S2]

Invoice support completeness issue: invoice folder sample has two main customers, while AR aging includes additional overdue customers not represented as a complete invoice pack. [S8/S9]

Policy-control mismatch: an ISO-based mobile device policy exists, but plaintext statutory credentials are included in the data room. [S21/S22]

Risk Register

Prioritized diligence risks.

Severity	Risk	Src	Recommended action
High	FY26 P&L/cash presentation does not reconcile across books and provisional FR	S2/S4/S6	Rebuild management accounts from GL + bank + FD schedules before valuation reliance
High	Plaintext tax/GST/TRACES credentials stored in a diligence folder	S22	Rotate credentials, remove shared secrets, enforce vault/MFA evidence
High	Revenue evidence is concentrated: unique invoice sample totals INR 9.47m, ~84.7% from Shopsense/Fynd	S9	Request complete customer-wise revenue, contracts, collections, and churn bridge
Medium	AR aging shows INR 1.10m due at 28 Feb 2026, including INR 0.59m older than 6 months	S7/S8	Confirm post-period collections and provision policy
Medium	Financial workbook contains #REF/formula issues in cash flow sections	S1/S2	Obtain locked signed financials and audit trail from accountant
Medium	Go-to-market depends on uncontracted pilots/prospects; pipeline slide lists named prospects but no executed docs for most	S10/S11	Confirm stage, owner, next step, commercial terms, and probability for each prospect

Financial: locked FY26 management accounts, GL-to-FS mapping, bank reconciliation, FD confirmations, deferred tax support, revenue recognition memo. [S1/S2/S4/S6/S24]

Revenue: complete contract folder for every current customer; invoice-to-bank collections bridge; ARR/MRR/churn cohort; unbilled/deferred revenue schedule. [S8/S9/S10/S14]

Legal: cap table from statutory registers, latest AoA/MoA, board minutes after pre-seed, conditions subsequent tracker, IP assignment for employees/contractors. [S10/S19]

Tax: GST/TDS/PT returns with challan reconciliation and portal access logs after credential rotation. [S0/S22]

Security/product: architecture diagram, cloud access list, code/IP ownership, data processing agreements, pen-test/SOC2/ISO evidence, backup/DR proof. [S0/S21/S22]

Operations/people: current org roster, payroll compliance, offer letters, contractor agreements, hiring plan tied to burn forecast. [S2/S17/S18]
